Semester II

Subject Code	Subject Name	Outcome
CS – 07	Data Structure & File Structure using C	After completing this course, students will be able – 1. To Learn and understand the concept of Data Structure, sorting, searching and File structure
CS – 08	Web programming using PHP	After completing this course, students will be able - 1. To learn web programming & Learn to develop website using PHP
CS – 09	Computer Organization & Architecture	After completing this course, students will be able - 1. To understand hardware of computer and working of its peripherals.
CS – 10	Foundation of Mathematics & Statistics	After completing this course, students will be able- 1. To Aware about basic Mathematics and Statistics 2. To perform mathematical & statistical operations and manipulations with confidence, speed and accuracy.
CS – 11	PRACTICAL – 1 (Based on CS – 07)	After completing this course, students will be able - 1. Data Structure & File Structure using C
CS – 12	PRACTICAL – 2 (Based on CS – 08)	After completing this course, students will be able - 1. CS – 08 – Web Programming Using PHP

S. Y. B.C.A.		
Semester III		
Subject Code	**Subject Name**	**Outcome**
CS - 13	**C++ and Object – Oriented Programming**	After completing this course, students will be able - 1. Understand the difference between object oriented programming and procedural oriented language and data types in C++. 2. Program using C++ features such as composition of objects, Operator overloading, inheritance, Polymorphism etc. 3. Simulate the problem in the subjects like Operating system, Computer networks and real world problem
CS - 14	**CMS with Word Press & Magento**	After completing this course, students will be able - 5. WordPress is an excellent choice for bloggers, small businesses, and content-focused websites. If you prioritize content management and want a flexible platform, WordPress is a solid option. 6. Choose Magento if you run a large-scale e-commerce business and require advanced features. Semester IV

Subject Code	Subject Name	Outcome
CS – 19	Programming with JAVA	After completing this course, students will be able - 1. Able to understand the use of OOPs concepts. 2. Able to solve real (time) problems using OOP techniques. 3. Able to understand the use of abstraction. 4. Able to understand the use of Packages and Interface in java. 5. Able to develop and understand exception handling, multithreaded applications with synchronization.
CS – 20	Programming with C#	After completing this course, students will be able - 5. After completion of the course the student will be able to use the features of Dot Net Framework along with the features of C#.
CS – 21	SAD, Software Quality Assurance and Testing	After completing this course, students will be able - 1. Understand the concept of Information Systems. 2. Define Quality Assurance Activities (QAA). 3. Grasp the decision sequence in software development.
CS – 22	Operating Systems Concepts with Unix / Linux	After completing this course, students will be able - 3. Learn about operating systems, functions of operating systems, system calls. 4. Learn about process coordination and process scheduling algorithms 5. Learn about memory management, critical section and deadlock handling algorithms. 6. Learn about file management and disk scheduling algorithms 7. At the end of the course, students will be able to implement various algorithms required for management, scheduling, allocation and communication used in Operating System.
CS – 23	PRACTICAL – 1 (Based on CS – 13 & CS – 14)	After completing this course, students will be able - 1. Programming With Java
CS – 24	PRACTICAL – 2 (Based on CS – 20 & CS – 22)	After completing this course, students will be able - 1. Programming With C# 2. Operating Systems Concepts with Unix/Linux

Semester VI

Subject Code	Subject Name	Outcome
CS – 31	**Mobile Computing using Android and iPhone**	After completing this course, students will be able - 1. Understand about the architecture and features of Android 2. Understand about the Android user interface 3. Learn to use SQLite Database in Android 4. Introduction and use of to JSON and XML
CS – 32	**Data Warehousing with SQL Server 2012**	After completing this course, students will be able - 1. Describe the aspect of data pre-processing Explain the concept of Data Cleaning & Integration Explain decision Trees and clustering
CS – 33	**Programming in Advance Python – 2**	After completing this course, students will be able - 1. Prepare flowchart and algorithm for solving computing problems. 2. Develop python programs to solve simple problems. 3. Apply control structure feature of python for developing programs. 4. Develop a program in Python using built-in functions, modules, and library functions. 5. Develop python programs applying strings and lists manipulation concepts.
CS – 34	**PRACTICAL – 1 (Based on CS – 31)**	After completing this course, students will be able - 1. CS – 31 – Mobile Computing using Android & iPhone
CS – 35	**PRACTICAL – 2 (Based on CS – 32 & CS – 33)**	After completing this course, students will be able - 1. CS – 32 – Data Warehousing with SQL Server 2012 2. CS – 33 – Programming in Advance Python – 2
CS – 36	**PROJECT – VIVA**	After completing this course, students will be able - 1. Project must be developed in the computer laboratory of concern institute under the supervision of faculties of concern institute on any subject of previous semester or current semester. (At the time of Project-Viva examination student must show all the Workouts, SDLC, Documentation, Program codes and project in running mode)
